EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the drawing:

Figure 18 has been labeled as "Prior Art."

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figure 18 has been labeled as "Prior Art." In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Remarks:

The above Examiner's Amendment was made because figure 18 has been disclosed (see for example page 1 of the specification) as a conventional drawing.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-14 is allowable because the arts of record fail to teach or fairly suggest the claimed "an automatic gain control circuit having in combination with the claimed first, second, third gain control means, control means and detection (level

and gain) means in claims 1,2,6 and 8; first, second gain control means, switching means in claims 7, 9 and 12; first, second, gain detecting, level detecting and first and second switching as in claim 10; and first, second gain control means, switching means and storage means as in claims 13 and 14; and first, second gain control means, switching (first and second) means, first and second level detecting means in claim 10.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 5,483,691 and 5,569,582 issued to Heck et al. and Kojima et al. respectively disclose a cascaded automatic controlling circuit for controlling the received IF signal and baseband signals.
